Installation Notes

Install this product according to the installation guide.

When determining the height of the mirrored cabinet, ensure the mirrored door will clear all obstacles, such as the faucet. A minimum distance of 1" is required.

Secure the screws (provided) to a stud to avoid possible property and product damage. If this is not possible, anchors (provided) must be inserted before installing screws.

Modular components can be joined horizontally. When ganging cabinets: rough opening width must equal total width of all cabinets minus 3/4".

Recessed cabinets project 7/8" from wall.
